Simplified Mobile

EE Future Mobile

Welcome to EE Future Mobile

Introduction

Future Mobile has been created to not only give resellers easier management and visibility of their customer connections but allows for future development of EE's wholesale model bringing new and exciting features going forward.

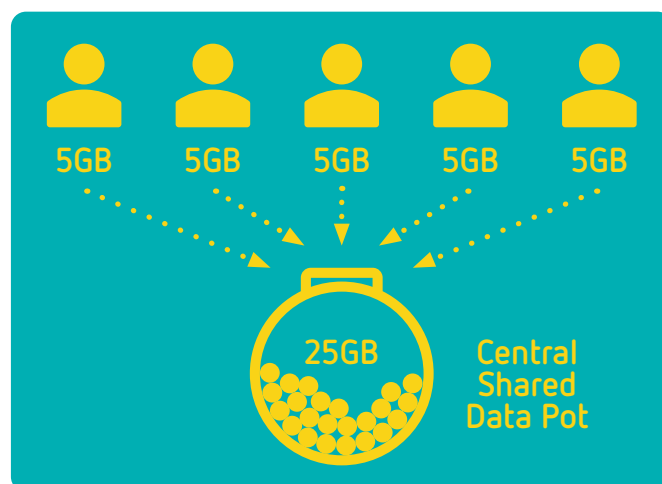

All new EE wholesale connections are now connected via EE's new billing platform which provides Future Mobile. The new platform means being able to offer the level of features that are now required in a growing, competitive and demanding wholesale market. EE has shaped this new billing platform to be able to offer what the old billing platform could offer, alongside the vital additions needed to stay competitive.

EE Future Mobile is suitable for existing Mobile resellers or for anyone new to mobile or EE wholesale.

What does Future Mobile offer?

- The ability to set spend caps at subscription level from £5-£500 (in increments of £5, £10, £20, £30, £40, £50, £75, £100, £200 and £500) with the option of temporarily or permanently opting out. This eliminates bill shock and enables consistent billing for the customer.
- Mid-month tariff changes – simply request a tariff upgrade and we will action it mid-month, giving your customer immediate flexibility.
- Alerts sent at 85% and 100% of usage, keeping customers in the loop on their data consumption.
- New Daily Roamer tariff – Gives your customer RLAH allowances for Zones A and B.
- Teams Plan Aggregated data – built for upwards of 10 users to corporate level, with no overage between data tiers.
- eSIM available on all tariffs.

Aggregated data – no more bill shock

One of the biggest highlights of Future Mobile is Team Plan which offers aggregated data for groups of 10 users and above. Each user is connected to an unlimited voice and text tariff and then all users have an equal allocation of data per person, bundled into a shared pot for everybody to use.

How does Team Plan with aggregated data work?

- The data pot is shared amongst all users. Some users will use more data than others.
- Each user contributes equal monthly data allowance to the central shared pot.
- Customer automatically moves up or down to the next data contribution tier at the end of every quarter.
- Quarterly usage reviews carried out to smooth spikes.
- No overage to pay if the data usage goes above current data tier.
- The size of the central shared pot grows as more data is used and/or more users are added.
- The customer will never move below their original contracted tier.

Commercials

Team Plan

All users have unlimited calls and texts and are then added to the aggregated team data plan where all users have the same allowance.

	Description	Term	Wholesale Price
EE Future Mobile - Team Voice	Team Unlimited Minutes & Texts	24 Months	£4.81
EE Future Mobile - Aggregated Team Data (All users must have the same allowance)	Team Data 250MB	24 Months	£3.09
	Team Data 500MB	24 Months	£3.44
	Team Data 750MB	24 Months	£3.78
	Team Data 1 GB	24 Months	£4.13
	Team Data 2GB	24 Months	£4.81
	Team Data 3GB	24 Months	£5.50
	Team Data 4GB	24 Months	£6.19
	Team Data 5GB	24 Months	£6.88
	Team Data 6GB	24 Months	£7.56
	Team Data 7GB	24 Months	£8.25
	Team Data 8GB	24 Months	£8.94
	Team Data 9GB	24 Months	£9.63
	Team Data 10GB	24 Months	£10.31
Team Data Unlimited	24 Months	£17.19	

Example: 10 users each requiring 5GB data - $10 \times £4.81 + 10 \times £6.88 = £116.9$ /month based on initial data tier.

EE Future Mobile	Teams Phone Mobile	1 Month	£4.81

Introducing Teams Phone Mobile

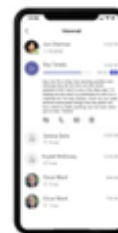

EE Future Mobile also allows the addition of offering Teams Phone Mobile. Customers can now empower their hybrid workforce across devices and networks by seamlessly integrating users' mobile identities with Microsoft Teams, and enable flexible calling and collaboration, from anywhere:

Single number reach

Unified voice mail

Unified call history

Seamless call transfer

Presence integration

Put your mobile number in Teams

Make and receive calls from your mobile phone's native dialer or Teams and work from any location, device, or network.

Enable secure and compliant mobile communications

Implement enterprise-grade business policies that are secure and compliant across mobile devices and communications

Synchronise your mobile with Teams

Unify business communications, including combined call history, voicemail and presence across devices

Combine services and reduce costs

A single calling plan covers your mobile and Teams communications. Additionally, reduce hardware costs with BYOD for mobile users

Calls just work

Stay productive anyway across networks and devices. Move seamlessly between devices without dropping calls

The power of Teams

Flawlessly switch between a mobile voice call and a Teams call for greater collaboration - adding other, sharing screens and leveraging the power of video.

Unified and integrated collaboration and communication tools

Increase productivity with a centralised view of all business communications.

Easy to manage

Set up accounts, reassign numbers and manage users via the Teams Admin Portal
