Big on tech ‘knowledgey’

“As the ‘go to’ people and place for technology for over 40 years, we bring together some of the sharpest minds in the industry. Our friendly experts have the knowledge and experience to help customers make informed choices—one of the many reasons they trust Nimans.”
Paul Burn, Managing Director.

Introduction

The modern workplace blends open offices, dedicated meeting spaces and flexible areas for focused work - alongside employees connecting virtually from different locations. Across every environment, the right combination of professional audio, video, networking and connectivity technology keeps communication seamless and productive.

This guide highlights the key areas that define today’s workplace - from personal collaboration devices to huddle rooms and large conference spaces, and everything in between. For each, you’ll find our recommended solutions from leading brands including Jabra, EPOS and Yealink - chosen for their performance, reliability and ease of integration.

Whether you’re designing new meeting spaces, upgrading legacy systems or enhancing how people connect and communicate, these solutions help you deliver consistent, high-quality experiences for your customers.

The Modern Workplace

What Today's Workspaces Look Like

Modern offices are built around flexibility, collaboration and inclusion. They combine a range of spaces designed to support different ways of working — from quick stand-ups and video calls to full-scale presentations and board meetings.

Employees expect technology that works effortlessly, wherever they are. That means consistent, professional-grade performance across every environment — from personal devices and individual desks to open collaboration areas and large meeting rooms.

Businesses are investing in solutions that:

- Deliver clear, natural communication through premium audio and video.
- Enable easy connectivity and seamless UC platform integration.
- Support scalability across multiple room sizes and locations.
- Depend on reliable networking and connectivity infrastructure to keep everything running smoothly.

The following sections explore each workspace in more detail, along with our recommended products that bring them to life.

Huddle Room

For up to 5 people

Compact, easy-to-use spaces for quick collaboration and ad-hoc meetings. Choose BYOD or Room System solutions for Windows and Android to deliver high-quality video and audio with minimal setup.

Small Meeting Room

For up to 8 people

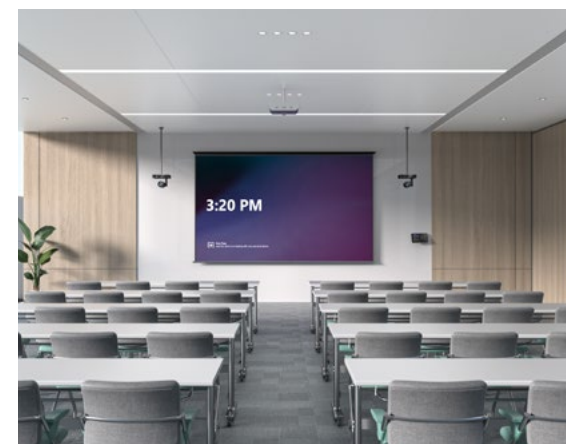

Purpose-built for productive team sessions and short meetings. Flexible BYOD and Room System options for Windows and Android provide reliable video conferencing and crystal-clear sound in every discussion.

Medium Meeting Room

For up to 12 people

Built for structured discussions and team collaboration. These solutions combine quality video, intelligent audio and seamless connectivity in BYOD or Room System setups for Windows and Android.

Large Meeting Room

For up to 20 people

Superior video conferencing and effortless collaboration in larger spaces. Intelligent cameras, premium audio and flexible platform integration deliver a consistent, professional experience for every participant.

Extra-Large Room

For up to 18+ people

Tailored for expansive spaces requiring exceptional video quality and seamless collaboration. With intelligent technology and premium devices, these solutions ensure every participant feels engaged, wherever they're seated.

Huddle & Small Meeting Rooms

Designed for Fast, Effective Collaboration

Smaller meeting spaces remain the heartbeat of modern collaboration - the go-to for quick discussions, brainstorming and impromptu catch-ups. Many are still under-equipped, yet users now expect the same high-quality experience found in larger spaces.

The right mix of professional audio, video and connectivity solutions transforms compact areas into high-performing collaboration hubs - delivering effortless meeting equality and a consistent user experience across every platform.

Our recommended solutions from Jabra and Yealink are designed specifically for rooms of up to eight people.

Jabra^{GN}

Jabra PanaCast 40 VBS

The only small room Android™ bar that captures the entire room. Delivers the premium features your customers love from PanaCast 50 VBS, now packed into a more compact form factor. And with a smaller price tag to match.

Medium Meeting Rooms

Intelligent Solutions for Seamless Collaboration

Medium-sized meeting rooms are the workhorse spaces of most organisations - where teams come together for structured discussions, client meetings and cross-department collaboration.

These rooms demand technology that's reliable, easy to use and capable of delivering professional-quality communication, whether people are in-room or joining remotely.

Choose BYOD or Room System setups to match the way your customers work - delivering clear audio, high-quality video and seamless integration with leading UC platforms. Both options provide a simple, consistent experience that helps every meeting start smoothly and stay connected from beginning to end.

Explore solutions from Yealink and Jabra for spaces of up to twelve people.

Jabra GN

Jabra PanaCast 50

Award-winning Bring-Your-Own-Device video bar offering plug-and-play access to more equal meeting experiences. Professional-grade audio, Panoramic-4K 180° video, and Intelligent AI-enabled features respond in real time for more immersive meetings.

- Unique 180° field of view keeps everyone in the picture
- Astounding sound from the world leaders in professional audio

Networking Solutions

The Foundation of Every Collaboration Space

Behind every reliable meeting room, video call and connected device is a network that delivers consistent speed, stability and security. From voice and video to data and device management, professional-grade networking keeps every element of modern collaboration running smoothly.

Explore our recommended products from TP-Link, DrayTek - including routers, switches and Wi-Fi solutions - all designed to optimise performance across every environment, from small offices to enterprise deployments.

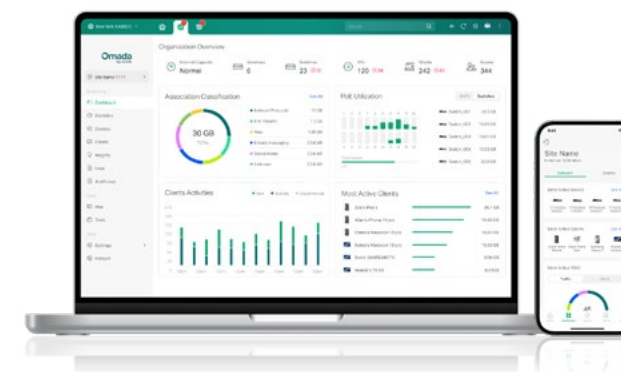

TP-Link Omada

Complete connected solutions for modern business

TP-Link Omada delivers a comprehensive, software-defined networking (SDN) ecosystem designed for reliable, high-performance business connectivity. From next-generation WiFi 7 access points to robust routers and intelligent switching, Omada gives organisations a seamless, centrally managed network that grows with their needs.

- Routers & Security Gateways
- DSL Routers
- 5G/4G Routers
- Switches & Gigabit Switches
- WiFi 7 Access Points

Omada Cloud Controller

Unified Management, Anywhere

The Omada Cloud Controller brings the entire network together, providing a single, centralised platform to manage access points, switches and routers across multiple locations.

- Monitor performance in real time
- Apply network-wide policies instantly
- Scale effortlessly as sites and devices grow
- Access secure, remote troubleshooting and configuration tools

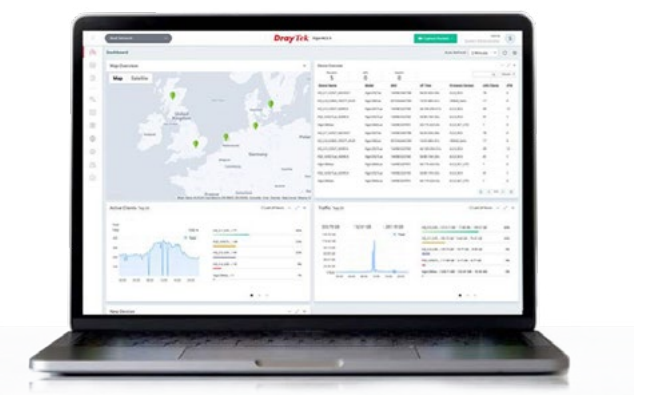

DrayTek

Trusted Business Networking Solutions

Enterprise-class networking and management to businesses of all sizes. With a comprehensive portfolio of routers, access points, switches and centralised management, DrayTek delivers connectivity, security and flexibility in one unified ecosystem. Whether you're supporting remote workers, branch offices or large campus installations, DrayTek gives you the tools to deploy rapidly, monitor centrally and scale with confidence.

- Routers (Vigor Series)
- Switches & Access Points
- Wireless & 4G/5G Connectivity

DrayTek VigorACS 3

Centralised Management

One of the standout features of DrayTek's ecosystem is the VigorACS 3 Network Management System. This software platform enables full oversight, provisioning, monitoring and control of DrayTek devices - routers, switches, access points - through a single pane of glass.

- Auto-provisioning of devices and firmware updates
- Real-time monitoring of device status, WAN/VPN health and alerts
- SD-WAN orchestration with latency, loss and jitter monitoring plus policy-based routing
- Captive portal and hotspot management for retail and hospitality

Audio Visual Solutions

Displays and Presentation Technology for Modern Collaboration Spaces

From huddle rooms to boardrooms, professional audio visual solutions bring ideas to life and make collaboration effortless. High-performance interactive touchscreens, large-format displays and presentation systems help teams share content, connect with remote participants and deliver impactful experiences in every environment.

We offer a broad portfolio of solutions from leading brands including ViewSonic, HikVision and Neon - designed to enhance visibility, engagement and communication across all modern workspaces.

ViewSonic®

Nimans Connect

End-to-End Connectivity & Licence-Based Solutions

For over 25 years, Nimans Connect has empowered resellers with end-to-end wholesale connectivity and licence-based solutions that build on Nimans' hardware expertise, providing complete communications opportunities – all delivered through leading industry partnerships.

We make growth simple with easy-to-sell bundles, competitive tariffs, a provisioning portal and ConnectPro (bureau) billing. Combined with Nimans' trusted hardware expertise, resellers can offer complete, multi-vendor communications packages that drive recurring revenue, strengthen customer loyalty, and create long-term opportunity.

Our Extensive Portfolio

Our extensive portfolio means you can reduce the need for multi-vendor partnerships as Connect serves as your single source provider offering:

- A wide choice of leading brands to match every customer requirement.
- 100% channel focused offering – we will never compete with you.
- Comprehensive billing capability with both wholesale and our white label billing solution Connect Pro Billing.

nimans connect

Fibre Connectivity

Our fibre portfolio includes SoGEA, FTTP and business-grade dedicated Internet access, delivered via leading partners and Altnets across the UK. Services are Switch-Off ready, enable smooth migration from copper with flexible contracts, free standard installation on selected terms and a self-serve portal.

UC Platforms

Our flexible UC and voice platforms cater to diverse customer needs with on-premise, cloud, self-hosted, or hybrid deployment options. With Teams and CRM integration, white-label portals, flexible licensing, hardware options, contact centre tools, and AI features, we deliver a comprehensive solution portfolio across four trusted providers to ensure the ideal fit.

Mobile and M2M

We offer voice and data mobile, M2M and IoT solutions across all four UK networks. With flexible tariffs, e-SIMs, aggregated data, fixed IP options and multi-network SIMs partners can deliver tailored, scalable solutions with strong recurring revenue potential – all delivered through a self-serve portal which includes proactive monitoring, and 24/7 support.

SIP

Connect's SIP delivers rapid deployment, instant provisioning and built-in fraud protection – integrating seamlessly with our UC platforms. Switch-Off ready and cost-effective, it offers flexible numbering, scalability, business continuity, and disaster recovery. Resellers gain reliable geo-redundant infrastructure, simple number porting, and comprehensive support.

AI Powered Engagement

Our AI-powered engagement solutions, delivered through partners including Intermedia, Simplified UC, Mitel, Yeastar and Talkative brings chat, video, voice, and messaging into a single platform to elevate digital customer service. Fast to deploy and easy to sell, they offer flexible licensing and enhance modern omnichannel journeys – a powerful addition to any voice or process automation requirement.

Why Nimans

Your Collaboration Partner

At Nimans we've earned an envious reputation as the 'go to' people and place for technology.

For over 40 years, we've supported the channel with the technology, expertise and service to help it succeed. We bring together world-leading vendors across voice, video, networking and connectivity to deliver complete, multi-vendor solutions that help partners meet their customers' evolving collaboration needs.

Our ISO-certified operations, seamless API and EDI integrations, and real-time online ordering ensure a smooth experience from first enquiry to final delivery.

We're here to make it easy to specify, source and support the right technology - first time, every time.

people and place
for technology

Meet the Category Teams

Voice Team

Our Voice specialists work with leading brands to deliver complete audio solutions for every environment and working style.

With extensive product knowledge, deep vendor relationships and fast UK-wide stock availability, we make it easy to specify and supply the right devices - from entry-level models to advanced UC-certified solutions.

voice@nimans.net

Video Team

Our Video team brings together world-class technologies to create seamless collaboration experiences across every space - from individual workstations and huddle rooms to boardrooms and auditoriums.

We offer expert advice, live demonstrations and tailored solutions to meet any customer requirement or budget.

video@nimans.net

Networking Team

Our Networking specialists ensure every solution is built on a strong, secure foundation.

Partnering with multiple leading vendors, we provide end-to-end connectivity, expert provisioning services and next-day delivery from our extensive UK stockholding.

networking@nimans.net

Connect Team

Our Connect specialists help build and deliver joined-up services across Mobile, Connectivity, UC Platforms, Broadband and SIP.

With a broad portfolio spanning connectivity, platforms and hardware, we make it easier to scope multi-vendor, end-to-end solutions. From shaping easy-to-sell bundles and tariffs to supporting provisioning and billing, we simplify the process from quote to live service.

connectsales@nimans.net

AV Team

Our AV team works with leading brands to deliver professional display and presentation solutions for every environment and workspace.

With expert product knowledge, strong vendor relationships and access to the latest technologies, we make it easy to specify and supply the right AV solutions for every customer requirement.
